PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with expertise in modern JavaScript frameworks (React, React Native) and robust backend architectures. Proven track record of architecting and deploying cross-platform applications. Ready to leverage development expertise in competitive freelance and enterprise environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, PHP, Java, SQL
Frontend & Mobile: React.js, React Native, HTML5, CSS3
Backend & Databases: Node.js, MySQL, Firebase
Tools: Git, GitHub, Android Studio, Vercel

ENGINEERING PROJECTS

Emergency Response System | Full-Stack Architect

[GitHub Repo](#) [Live Admin Dashboard](#) [APK Download](#)

- Engineered a cross-platform mobile application using React Native for live GPS tracking and SOS triggers.
- Developed a secure web-based administrative dashboard using React.js and Firebase.

Biometric Attendance System | Sole Developer

[GitHub Repo](#)

- Architected an automated university attendance platform using Python for facial recognition and MySQL for database management.

Internship Management Platform | Full-Stack Developer

[GitHub Repo](#) [Live Demo](#)

- Built a centralized web platform for streamlining internship applications using React and Firebase.

Social & Gaming Asset Marketplace | Collaborative Developer

[Live Demo \(Telegram Bot\)](#)

- Developed a web interface and integrated a Python-based bot (AderaTradeBot) for automating social media and gaming asset trades.

EDUCATION & HONORS

Hawassa University, Faculty of Informatics | *Bachelor of Science in Information Systems*
Graduated with Distinction. Successfully completed University Exit Exam with a score of 80.
